PROFESSIONAL SUMMARY

A dedicated Frontend Developer with hands-on experience in **React.js, JavaScript, and WordPress**, along with a strong foundation in database management. skilled in building dynamic and responsive web applications.

SKILLS

- Web development
- Front-end development
- Cypress
- MongoDB
- React.js
- Node.js
- DOM manipulation
- Rest API
- Bootstrap
- HTML5
- CSS
- Git
- GitHub
- Figma

EXPERIENCE

08/2024 - Current

Software Intern

Luminar Technolab - Calicut, Kerala

- Gained proficiency in **CSS, Bootstrap, JavaScript, React, MongoDB, and Node.js** during a six-month internship.
- Built **responsive websites using React**, leveraging state management, Hooks, and Axios for API integration.
- Developed **RESTful APIs** and implemented **CRUD operations in Node.js** with MongoDB.
- Managed **MongoDB** to ensure efficient data storage and retrieval.
- Enabled seamless **front-end and back-end communication** through effective API development.

06/2022 - 09/2023

Frontend Developer

louring Private Limited - Chennai, TAMIL NADU

- Developed custom **WordPress themes and plugins**, improving performance and user experience.
- Built dynamic **React applications** using a component-based architecture for modular development.
- Implemented **state management and Hooks** to enhance functionality and maintainability in React projects.

PROJECTS

Budget Calculator

- A responsive web app for managing expenses, features of adding and removing budgets with real-time total updates.
- Implemented login functionality with personalized home page display and

data persistence using local storage.

- Technologies used - HTML, CSS, JavaScript, Local Storage.

Quiz Application

- React-Redux quiz app with multiple categories, enabling users to explore multiple categories and attempt quizzes.
- Utilized Redux for efficient state management and Axios to fetch categories and questions from an API dynamically.
- Implemented functionality to store user answers, track real-time progress, and display final scores on a result page.
- Technologies used - React, Redux, Axios, JavaScript

Video Management System

- Built a **movie video management system** using **JSON Server** as a mock backend and **React** for the UI.
- Implemented **CRUD operations** for video cards to manage movie-related videos.
- Added **drag-and-drop categorization** for organizing videos into different groups.
- Utilized **REST APIs** to dynamically fetch, update, and manage video data.

CERTIFICATIONS

- Online Certification Course on JavaScript for Beginners: Learn E-Box.Javascript from Scratch.
- Cypress – Modern Automation Testing from Scratch + Frameworks, Udemy
- Programming Foundation with JavaScript, HTML, and CSS, Coursera.

EDUCATION AND TRAINING

08/2021

Bachelor of Technology: Computer Science And Engineering
MES College Of Engineering - Kuttippuram, Malappuram
